Dear Hiring Manager,

Security is not a feature checklist — it is a culture that must be built into every layer of an organization. After two years of IT consulting for international enterprise clients, I led Xihua Pharmaceutical to ISO 27001 certification, deployed KnowBe4 phishing simulations across 5,000+ users at YumChina, and delivered security awareness programs for 200+ employees at Decathlon. I am ready to bring this hands-on compliance and DevSecOps experience to your organization.

Leading ISO 27001 certification from gap analysis to compliance

As Project Lead for Xihua Pharmaceutical's ISO 27001 certification, I conducted a comprehensive enterprise-wide gap analysis across 12+ departments and produced over 200 compliance documents — including information security policies, risk treatment plans, and internal audit procedures aligned with GDPR and ISO 27001 requirements. I established an automated compliance monitoring framework using n8n workflows. The project achieved ISO 27001 certification (ENR-00976588) on schedule, certified by BSI Group.

Building security culture through measurable training programs

At YumChina, I designed and deployed a KnowBe4 phishing simulation program covering 5,000+ enterprise users across multiple business units. I ran baseline and post-training phishing assessments, achieving measurable reductions in click-through rates. I delivered monthly security awareness reports to the CISO and department heads, tracking KPI trends via automated dashboards. At Decathlon, I delivered security awareness sessions to over 200 employees across retail operations.

Why this organization, and why now

Security threats are escalating and regulatory requirements are tightening. I bring the rare combination of compliance leadership (ISO 27001) and hands-on DevSecOps experience. I am fluent in both Chinese and English, which allows me to operate effectively in international and cross-border security environments. I am excited about the opportunity to contribute to your organization's security posture.

Thank you for your time and consideration. I look forward to discussing how my background in ISO 27001 compliance, KnowBe4 training programs, and DevSecOps can contribute to your organization's security objectives.

Best regards,

Yuanshuo Du
